FZ FORZA WORKBOOK 2023

Dear partners,

here we are – the 2nd edition of the FZ FORZA workbook for the season 2023/2024. I would like to take this opportunity to thank you once again for the great and successful cooperation in 2022 – it was a particularly challenging year for everyone due to the much-cited "turn of the times" and the global changes in the procurement of goods!

Again we managed to put together an attractive complete range for 2023/2024 – also we have optimised the availability of goods so that we can dispatch your orders within 24-hr as usual.

Nevertheless, we are not immune to the current economic challenges, such as significantly increased prices in purchasing, for energy and the import or export of our goods.

However, we have managed to avoid special price increases and have been able to improve the margins for you as our partner once again – the sea freight rates have currently stabilised and the current euro/dollar exchange rate means that our prices have only had to be marginally adjusted.

The issue of sustainability has still high priority on FZ FORZA brand – all textiles are made of polyester created from recycled plastic bottles. Since 2022 we, at VICTOR Europe, have completely converted our vehicle fleet to e-mobility/hybrid drive, as well as not using PVC covers for our rackets and much more!

We are particularly proud of our climate certificate for our sea transports. The resulting CO2 emissions are offset via the project portfolio of Klimainvest Green Concepts GmbH.

Here's to a successful year!

With sportive greetings,

Andreas Sievers

FZ FORZA SINCE 1990

FZ FORZA was founded in 1990 in Denmark as an alternative to the Asian brands. Since day one, the mission of FZ FORZA has been to create top quality badminton products at fair prices. In other words we strive to create badminton products for everyone and aim to be the preferred brand by all kind of players from beginners to professionals without compromising on quality and design.

RECYCLING

At FZ FORZA we take great pride in working with sustainability, and we strive to improve our sustainable business conduct continuously. Our entire apparel range is made of recycled polyester - most of it even 100% recycled polyester. The polyester thread is created by plastic bottles that is chopped into small peaces, then melted into a fiber and lastly spun into yarn from where a variety of different fabrics are woven. On average 1 tee takes around 25 bottles to make, and 1 pair of shorts or a skirt takes around 15 bottles to make.

All styles that are made of recycled polyester will be marked in the catalogue with this icon: 

The product itself will have an extra hang-tag in front of the normal one.

“ FZ FORZA is developed in Denmark by badminton players for badminton players. ”

TECHNOLOGY

RECYCLED POLYESTER

All our apparel made of polyester is marked with the Anti Shrink technology as polyester does not shrink and you can by this avoid size changing. Follow the care label and your FZ FORZA clothes should be your favorite badminton clothing for years.

DryForze keeps you comfortable during the game! With the unique DryForze treatment, we ensure maximum comfort. DryForze makes the fabric perspiration transporting, quick drying and super pleasant to wear, and the DryForze capabilities will stay with your clothes for much longer than similar technologies. Fabric treated with DryForze has high breathability and a cool wearing comfort.

Our garments are made in fabrics either constructed to avoid anti-pilling or fabrics that are given an anti-pilling treatment. Even after washing several times, the surface will still look good.

When moving around you create static electricity, but our fabrics prevent the garments from sticking to your body. To avoid your garments from being static, please do not tumble dry.

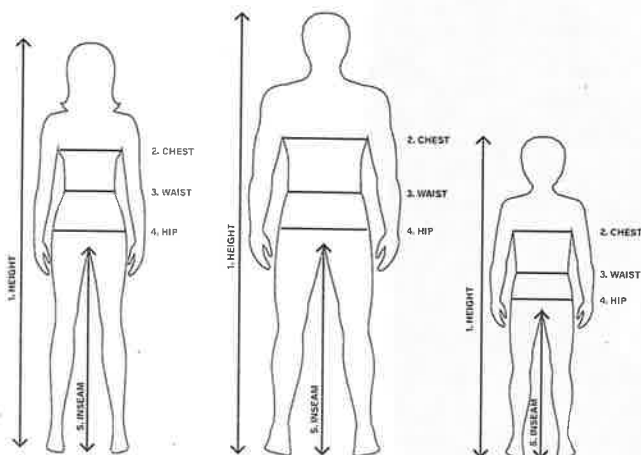

Most fabric is stretchable either by knitting or due to added elastane. We make sure that the style has just the right stretch in order for the style to both fit the body and give comfort.

MEASUREMENT GUIDE

How to choose the right size?

If your body measurements for chest and waist do not correspond with the same size, then choose the size which is closest to your chest measurement. If your are in between to sizes, then choose the smallest size for a tight fit or the bigger size for a loose fit.

WOMEN:

SIZE	2XS	XS	S	M	L	XL	2XL
Chest	78	82	86	90	94	100	106
Waist	62	66	70	74	77	80	83
Hip	87	91	95	99	103	109	116
Inseam length	77	78	79	80	81	82	83

MEN:

SIZE	XS	S	M	L	XL	2XL	3XL
CHEST	92	96	100	104	110	116	122

FZ TECHNOLOGIES

F-ZONE

Our F-Zone Grip ensures excellent grip on the court which supports the slip resistance. F-Zone Grip consists of various patterns that support a variety of movements in badminton and padel, so the grip on the court is optimal in all game situations. We only use rubber of the highest quality for our soles to ensure an extremely wear resistant outsole.

LAT

The lateral stability technology enhances the durability of the shoe and the lateral stability of the forefoot during intense and rapid change of direction. Lateral stability is important in a badminton and padel shoe when moving quickly around on court from side to side.

ASE

By inserting this light weight TPU piece under the arch creates both a lighter and stronger shoe, but also more stable. ASE supports the arch and helps prevent pronation and torsion in the shoe for increased functionality and comfort.

TUCK BOARD

Our Tuck Board increases the shoe's torsional flexibility. Torsional flexibility supports the foot's natural movement and allows the foot to move faster. Our Carbon Tuck Board is made of three-dimensional carbon fiber sheets that support the torsional movement and reduce stress on the arch tendon.

DRYPLEX

Consists of special mesh layers and holes in the shoe that provides excellent breathability for the feet. Drylex helps transporting moisture away from your feet to keep them dry and comfortable.

X-TECH

The ankle is exposed to twisting with the many sideways motions in badminton. A twist in the ankle is one of the most common injuries in badminton, but with the evolutionary FZ FORZA X-Technology the stability of the ankle is increased which prevents/reduces the twisting of the ankle.

**FZORB**

FZorb is a fantastic material for shock absorption. By molding the FZorb into the heel-area of the sole, it decreases the force of the many hard shocks that player's feet are exposed to during the game, as well as providing increased comfort for the player.

**DURA-COAT**

Our high-tech microfiber PU treated with a thin coating. The combination of Dura-coat gives the shoe extreme durability and a unique abrasion resistance. Dura-coat is applied on areas where the shoe is most exposed for abrasion.

FZ AERO POWER PRO-S

FZ230024

SHAFT: 40T U-HM CNT graphite

FRAME: 40T U-HM CNT graphite

Aero Power Pro-S is one of our new badminton rackets in the Aero Power series. The racket is 12-18% thinner than the average racket (Slim Frame Tech.) to achieve a slimmer racket frame that moves faster through the air, without sacrificing power or torsion. The combination of a stiff shaft and a HH balance gives the racket both great power and control for the more experienced player.

FZ TECHNOLOGIES

As we continue to improve our rackets and strive towards creating the best racket in the world, we continually research and develop new materials and ideas to take our rackets to the next level. Carbon Nano Tubes (CNT) is based on extraordinary small scale advancements in the material construction. Thanks to our cooperation with Aalborg University in Denmark, FZ FORZA is able to introduce world-class rackets manufactured using polymer composite materials modified by Multi-Wall Carbon Nano Tubes (MWCNT). Thanks to the MWCNT technology your FZ FORZA racket has improved durability in comparison with conventional rackets. The polymer resin that binds the carbon fibers together will ensure toughness and damage tolerance.

Combining the benefits of the hexa and octagon shape, this innovative shape gives you both increased strength in the racket, while being thinner on top. Decreased air-resistance combined with less torque makes this a precise, fast and durable weapon on court.

The slim frame is 12-18% thinner than conventional rackets. We achieve this by combining superior high grade materials and resins with our proprietary production methods to achieve a slimmer racket frame that moves faster through the air, without sacrificing power or torsion.

FZ FORZA has developed a hexagon frame which is more narrow and stronger than usual. It gives reduced air resistance and less torsion. That means faster reactions, better control and more power.

Our air flow frame reduces drag and air resistance during your stroke, enabling you to deliver more power and precision. Furthermore the more rigid T-joint construction offers a much more stable frame with almost no torsion, allowing you to put the shuttle exactly where you want it.

FZ FORZA has developed an octagon frame which ensures that the air flows around the frame with greater ease, thus increasing your reaction time. The frame is also more narrow and stronger than usual reducing air resistance and providing torsion. The frame design is extra durable, making you play stronger for longer.

The slightly oversized frame helps increase the sweetspot for easier shot-making and increased fun while playing. The racket is still light and the special shape of the oversize head means that you will still be able to generate lots of power. The future of oversize rackets has started here.

Kevlar® is a very advanced material which combines great strength with light weight. The material is elastic and yet 5 times stronger than steel. Therefore Kevlar® has a lot of uses and is used for bulletproof vests among other things. When FZ FORZA uses Kevlar® in combination with graphite in the rackets we can make light and extremely strong rackets with a lot of power. Kevlar® helps absorb the shock at impact, making the racket feel soft and comfortable which lets you generate more power.

Titanium is a very light and rigid material which is used to build space shuttles among other things. The combination of graphite and titanium increases the racket's durability and gives the racket increased control.

This material is used to enhance the performance in our very best rackets. The ultra high modulus graphite is stronger and stiffer than ordinary graphite, creating rackets that have less torsion and more power. This will give you more accurate and powerful strokes.

The slim shaft greatly reduces the air resistance when swinging and it greatly increases your swing speed, but with less effort. The FZ FORZA slim shaft rebounds almost as fast as a conventional shaft, meaning that you get much more stability and accuracy, making it a superior choice when you are looking for a slim shaft racket.

Power frames are frames with extra wideness or extra stability on top of the racket frame. This makes the frame stronger and less flexible in this area which generates more of the energy into the stroke. This normally indicates a little more weight in the top of the frame compared to normal frames, which also helps to optimize the power.

FZ FORZA GRIP POWDER

FZ213977

COLORS: White

FZ FORZA Grip Powder will help you get a tighter grip around your badminton racket. The sweat absorbent grip powder is a great option for players that already use the 'Towel Grip' and deal with sweaty palms during matches. The pack includes 4 bottles, each containing 25 grams of powder.

FZ TECHNOLOGIES

COMPOSITE GRAPHITE

This racket is made of a combination between graphite and glass fiber. The frame is graphite and the surface and hitting area are both glass fiber.

100% GRAPHITE

This racket is made of 100% graphite, which gives the player really good playability.

3K GRAPHITE

The 3k woven graphite rackets also consists of 100% graphite. The benefit of the 3k woven graphite makes the racket stronger and more durable.

12K GRAPHITE

A 12k graphite is a tight woven graphite which creates a really high graphite quality and gives players a really good racket with perfect playability and durability.

18K GRAPHITE

The top quality for padel rackets. Best graphite, best durability and best playability. The best material you can get!

SOFT EVA

A soft eva means that the eva foam inside the racket is quite soft. This gives the player a really good touch and nice feeling when playing.

HARD EVA

Rackets with hard eva inside insure that the touch is very fast and accurate. Here the player has good chances of hitting the ball hard and with lots of power.

X - SPIN

The rackets marked with the "x-spin" logo all have a more rough surface than basic rackets. This gives players a better chance to "grab" the ball and create a lot of spin while playing.

X - PROTECTION

If "x-protection" is marked on the racket it means that an extra frame protection is added on top of the frame from production. This protection helps to protect the racket when hitting the ground or wall.

HEAD LIGHT

The head light rackets gives players a very easy handling and really nice feeling. Your movements are faster, and this helps your control while playing.

MEDIUM BALANCE

Medium balanced rackets are a balance between the optimized handling from head light rackets and the more powerful head heavy rackets.

HEAD HEAVY

The head heavy rackets gives the player maximum power. When hitting the ball you will create more power with a head heavy racket.
